Projects

Flipkart Website Clone.

Designed and developed a responsive Flipkart Website clone from scratch, leveraging modern web technologies including HTML, CSS, JavaScript

Features:-
.1. User Authentication and Authorization
2. Shopping Cart and Checkout Process.
3.Product Sort and Filtering.

Areas of Responsibility:-
•Built product details page and cart page
•Distributed the work among the team members

Bluefly Website Clone.

An e-commerce website where users can explore and buy clothes, electronics, groceries, etc.

Features:-
Users can see the latest products and product categories
•Login and signup using Google ReCAPTCHA
•Sorting and filtering
•Users can increase and decrease the quantity of the product
•Users can apply the promo code
•Add to cart, payment

Areas of Responsibility:-
•Built payment page and cart page
•Distributed the work among the team members

Tech Stack:-
JavaScript| CSS| HTML| JSON

Online Medical Store

It is a Online Pharmacy, ayurvedic store,Health Store

Features:-
To achieve this, we utilized Chakra UI for styling, React Router DOM for routing (including private routing), Redux Thunk for state management, Axios for fetching data (including query params), and Render.com for server hosting.

Areas of Responsibility:-
•Built payment page and Address page
